Water Efficiency Checklist

This checklist is split into three sections.

Section 1 Project details.

Section 2 Bathroom, En-suite & WC details.

Section 3 Kitchen & Utility details.

Section 4 Additional water saving details.

Please answer as many questions as you can in order to make your calculation as accurate as possible. The correct 'flow rates' (to be entered into the cells highlighted in green) are important, as without these, we will have to use 'worst case' figures that may cause your property to fail this calculation. If possible, please also provide marked floor plans (PDF's are preferred) of the property being surveyed, to assist us in correctly identifying the rooms and quantity of fittings.
